Elvar Theodorsson was born in Iceland in 1953 and did his medical training in Iceland and Norway, graduate education at the Karolinska Institute and specialist training in Clinical Chemistry at Karolinska Hospital in Stockholm, Sweden. Appointed professor of Neurochemistry at Linköping University in 1995, he currently has a h-index of 61 (ISI). Consultant work in general clinical chemistry, endocrinology, haematology and quality management and head of Laboratory medicine at Region Östergötland 1996-2001 employing 500 personnel. He has taught in medical schools at Karolinska institute and at Linköping University since 1980, and is one out of three authors of the Medical curriculum at Linköping University admitting 240 students/year. Actively engaged in specialist training activities since 1987, he has served as president of the section and of the board of U.E.M.S. Medical Biopathology and currently serves as chair of the Scientific committee of the European Federation of Clinical Chemistry and Laboratory Medicine (EFLM). He has created QM – a quality management client-server software widely used in clinical laboratories in the Nordic countries and participated in the Eurachem work on the “Validation Guide”. He currently participates in Eurachem working groups on Measurement uncertainty and Traceability and Qualitative Analysis and serves as one of the Swedish representatives in Eurachem.
